

INSTALLATION INSTRUCTIONS FOR ILLUME LED BACKLIT MIRROR

WARNING

All fittings must be installed in accordance with current IEE wiring regulations. If in doubt, consult a qualified electrician. Switch off the electrical supply at the mains BEFORE installation and maintenance. Suitable for Bathroom Zones 2, 3 and non bathroom/dry areas. See diagram below. NOT suitable for above baths or Zone 1 nor for installation in Saunas, Steam Rooms or Shower Cubicles. DO NOT connect to a plug and socket outlet. Suitable for indoor use only. DO NOT fix to damp or conductive surfaces. Site well away from curtains and fabrics. NEVER cover the mirror. Switch off after use. DO NOT leave on for prolonged periods.

IMPORTANT! BEFORE YOU BEGIN

Inspect the product immediately upon receipt for transit damage or missing parts.

Handle the product with care and protect against knocks to all sides and edges of the glass. Fixings supplied are for use in solid walls, hollow or stud walls will require specialist fixings available from your hardware store. Make sure that you have all the tools you need to complete the job (SEE BELOW). Ensure there are no hidden pipe or cables in the wall before drilling. If drilling holes in ceramic tiles use a piece of masking tape on the tile to stop the drill bit from slipping.

AFTERCARE INSTRUCTIONS

Clean using a soft dry cloth only when turned off. **Never use cleaning agents or abrasive materials.** Do not allow moisture to come into contact with lamps.

CONTAINS:

1x Mirror, 2x screws and 2x wall plugs

INSTALLATION INSTRUCTIONS

1. **Switch off the electrical supply at the mains before beginning.**
2. **Using the template, mark the wall with a pencil.**
3. **Ensure that the mirror is level and check there are no hidden pipes or cables before drilling.**
4. **Wearing suitable eye protection, drill 2 holes using 3/8" drill bit and fix the wall plugs and screws in place leaving the end of the screw head protruding from the wall, about 1/4"**
5. **Locate the holes for fixing the mirror light at the top of the mirror frame and feed the light cable through ensuring that any grommets are replaced.**
6. **Make the electrical connections in accordance with current IEE wiring regulations. If in doubt consult your electrician.**
7. **Carefully hang the mirror.**
8. **Switch on the mirror light using the Switch at the side.**

ILLUME ELECTRICAL CONNECTIONS

The LED Driver inside the enclosed Illume mirror has already converted the electric to 110 volts. You can connect the 24" lead coming out of the center of the mirror directly to your electrical connection box. The lead contains 3 wires:

- **GREEN = GROUND** wire.....connect to ground wire in your box, or to the box as a ground.
- **WHITE = NEUTRAL** wire.....connect to the White neutral wire in your box.
- **BLACK = HOT** wire.....connect to the Black hot wire in your box

The Illume wires get connected to your 110 Volt electric box that you should have placed in the wall, behind where your Illume Mirror will be mounted. It doesn't have to be exactly in the center as the lead wire gives you flexibility in the placement. However we suggest you place it somewhere towards the center.

When you hard wire your new Illume mirror you may connect it to your wall switch by leaving the mirror rocker switch in the ON position and using the wall switch for On/Off.
